Basic types of salt harvesting methods

- Manual harvest by hand and manual transport
- Manual harvest with tools and manual transport
- Manual harvest with tools and mechanised transport
- Mechanised harvesting and mechanised transport

Salt Partners

Salt harvesting in Ghana

In Ghana, the most simple salt harvesting method – by bare hand – is still being practised today.

Salt Partners

Salt harvesting in Portugal

SALEXPOR

In Portugal, salt is still harvested using an ancient method brought in by the Arabs in the Middle Ages.

However, also semimechanised and fully mechanised harvesting techniques are employed in modern saltworks.

Salt Partners

Manual harvest and mechanised transport

SALT PARTNERS

In Bulgaria, the transport of the harvested salt has been mechanised but the salt is still being harvested by hand.

Two belt conveyors bring the salt to a slurrying vessel mounted on a tractor.

Watch the video: www.youtube.com/watch?v=e95ZGsoCWJ0 (2':50")

Salt Partners

Hydraulic transport of salt slurry

Hydraulic transport lines.

One pipe carries the slurry, the other line brings the transport brine back to the slurrying vessel on the tractor.

Men push the lines mounted on wide wheels.

Salt Partners

Salt washing plant on rails

SALT PARTNERS

Salt slurry is discharged to a salt washing cone.

The overflowing transport brine is pumped back to the harvesting unit.

Basic types of mechanical salt harvesters

- Tractor driven or self propelled
- On wheels or on Caterpillar tracks
- Driving on salt bed or on crystalliser floor
- Cutting salt bed upwards or downwards
- Discharging onto belt conveyors or into trailers

Salt Partners

Harvesting system in Yucatan, Mexico

double wheels drives with one side on the salt and with the other side on the crystalliser bottom. The harvester lifts the salt to a double wheeled trailer pulled by a truck driving on the salt bed.

Tractor pulled harvester on

Salt Partners

Harvesting system in Yucatan, Mexico

The salt layer is first ripped (scarified) and then windrowed.

Salt floor is maintained on the crystalliser bottom.

The higher cost of multiple operations is optimised against the lower cost of equipment.

Feeding system to the washplant in Yucatan

Salt is discharged from the trailers automatically, directly into the feeding hopper of the washing plant.

Salt Partners

Harvesting system in Kalloni, Greece

SALT PARTNERS

Kalloni saltworks operate a harvesting machine on Caterpillar tracks.

The machine drives on the salt, cuts the salt bed on the side and lifts the salt to belt conveyors.

Watch the video: www.youtube.com/watch?v=qDQtSABdzZE (3':34")

Salt Partners

Kalloni salt harvesting system

SALT PARTNERS

The Kalloni harvesting operation is controlled by a man walking alongside the harvester. He adjusts the position of the cutting edge by a hand held controller.

Observe the salt layer being lifted from the mud floor by the cutting edge.

Salt is cut downwards, thrown upwards and lifted by a rubber belt to the belt conveyors.

Kalloni salt transport system

Belt conveyors bring the salt to a mobile bin driving on a causeway.

Dumpers transport the salt to the washing plant.

Salt Partners

Messolongi harvesting system

The cutting level is controlled mechanically by a plate sliding on the salt layer surface.

The salt is broken upwards and lifted to a belt conveyor.

Salt Partners

Walvis Bay (Namibia) harvesting system

Walvis Bay salt harvesting system was supplied by ROV Durrant Pvt Ltd, Port Elizabeth, South Africa.

The harvester moves on Caterpillar tracks, both on the salt bed and on the crystalliser floor. Salt is loaded directly to the trailers.

Watch the video: www.youtube.com/watch?v=pZ-zwCR2B8k (2':36")

Salt Partners

Walvis Bay harvester

Salt is cut by a rotating drum upwards and discharged to a chain elevator located behind the drum.

Cutting elevation is controlled by a laser.

Salt Partners

Salt transport at Walvis Bay

Wide wheel trucks with two trailers bring the salt from the harvester to the washing plant.

Salt is discharged from the trailers automatically through the bottom opening.

Salt Partners

Not all salt harvesters are successful

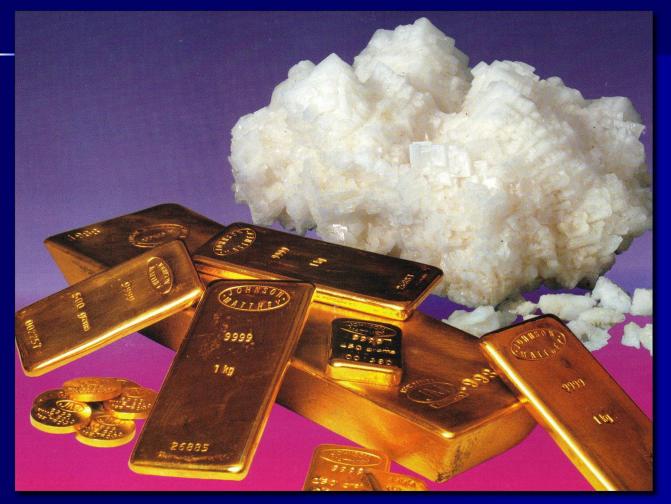

wrongly designed salt harvester that landed on the scrapyard.

Example of a

Conclusions

- There are many salt harvesting systems
- Which system is the best for you, depends on many factors
- Salt Partners experience is at your disposal

Why not turn your salt into gold?
